Generate Shipping batches each day to limit number of boxes being shipped

1. In **View Shipment**, highlight the blank line at the bottom of the list

2. Go to Setup Shipment --> Select Storage Items

- 12 or less boxes per batch
- One batch for NEG plasma boxes
- One batch for NEG DBS boxes
- One batch for all POS specimens

3. Set Address to Central Lab in **Shipment Destination**

4. Click the Add button 🔶

QA/QC

QA/QC verifies the contents of the boxes in the shipping batch using the LDMS barcode.

1. Use report buttons in **View Shipment** tab to create dummy **Manifest Report** and close – *Do not print* -- **Proceed to Shipment QA/QC tab**

- QC Plasma A1, C2, F4, G9
- QC DBS one random card each box
- 2. Click the Save button
- 3. View Shipment tab will display In Progress

Import

Receiving Lab.

Shipment Type: LDMS Shipping

1. Generate Manifest Report and Close

Container Name: DBS-P ZW001 001

-

• The QA/QC Status column on the View Shipment tab will always display In Progress.

Any specimen failure requires QA/QC of the full box.

LDMS Shipping File

- 1. Select LDMS file \rightarrow click Ship
- 2. Shipping temp: Techni Ice
- 3. Save to C:\
- 4. Use report buttons on View Shipment tab to create Manifest Report and Box Report
- 5. Print first page of each, place in shipping container with flash drive
- 6. Export both reports as PDF. Save on flash drive with shipping file
- 7. The LDMS Shipping file will be in a file folder with the same number as shipping batch. Transfer to flash drive

After Shipping

In the Storage module

- Use the **Ship Check** function in the **Search** tab once specimens are successfully received at their destination (See Storage Quick Reference guide)
- To add a new box in the empty rack space, use the Details button: Rename boxes as labeled

Notes:

• When creating the shipping file Invalid Frozen date/time errors require the Specimen date and time to be edited before the item can be shipped
